Started trial operation of "Recycled Plastics Exchange"
for the purpose of trading recycled plastic materials
Bridging supply and demand among companies to promote the
effective use of plastics**

Hamee Corp. (Head Office: Odawara City, Kanagawa Prefecture, President and CEO: Ikuhiro Mizushima, Securities Code 3134:TSE Standard Market) announced that its recycling service for waste plastic, "ParallelPlastics", began trial operations of "Recycled Plastics Exchange," which trades plastic products such as surplus inventories as raw materials for plastic recycling, with the aim of promoting the effective use of plastics. We will widely solicit listings from companies that are considering the effective use of surplus inventories and other items.

■ Background

We developed a service "ParallelPlastics" that transforms plastic products that are no longer needed into new products in order to effectively utilize plastics. One of the challenges we have identified in developing our services is the difficulty of obtaining recycled plastic materials.

In recent years, there has been an increase in the number of cases which recycled plastic materials are used, mainly by global companies. However, information on the disposal and storage of plastic products that are used as raw materials is not publicly available, so it is difficult to find desired materials or recycled plastic materials with colors when needed.

On the other hand, despite the fact that there are still ways to use them, there are many plastics that are burned as fuels without finding ways to use them effectively.

Against this background, we opened "Recycled Plastics Exchange." We connect the demand and supply of companies with plastic products that have nowhere to go and manufacturing companies that need the plastic products to accelerate domestic plastic circulation.

■ About the Recycled Plastics Exchange

URL : <https://exchange.parallelplastics.net/>

This is a EC website primarily for the trading of recycled plastic materials between Businesses.

Listed companies can list plastic scraps generated during the manufacturing process, plastic products that remain sleepy in warehouses, and other items for free. The purchasing company can purchase the required amount of recycled plastics of the desired materials and colors.

※Membership registration (free) is required for use.

※Only recycled materials can be listed. Virgin plastic materials are not available for listing.

Going forward, ParallelPlastics will promote the effective use of recycled plastics through the "Recycled Plastics Exchange", while spreading the use of diverse recycled plastics.

■ About ParallelPlastics

URL: <https://www.parallelplastics.net/>

ParallelPlastics is a new energy-saving and cost-saving recycling service. This product is made into beautiful materials by mixing plastic with different colors and composition, such as products that are out of stock and no longer sell and waste plastic generated in the manufacturing process.

In general material recycling*1, collected plastics are sorted and cleaned, and once returned to pellets, a plastic raw material. Then, by adding virgin material, strength is supplemented and reused.

On the other hand, ParallelPlastics eliminates the process of pelletizing and adds no virgin material. We recycle into products with beautiful designs such as natural stones in a simple way that merely melt and mix plastic with different composition. Since the recycled plastic purity is 100%, the feature is that it not only reduces costs and energy, but can also be recycled more easily than the conventional method.
