1. Qualitative Information on Quarterly Financial Results

(1) Explanation of Operating Results

The forward-looking statements herein are based on the judgments of Kringle Pharma, Inc. (the "Company") as of the end of the second quarter under review.

In the Japanese pharmaceutical market during the six months ended March 31, 2024, generic substitution increased in face of rising medical costs associated with population aging and drug prices declined significantly due to "off-year" NHI price revisions. Meanwhile, higher new drug development costs, reflecting the growing scale of clinical trials, accelerated alliances and M&As between pharmaceutical companies in Japan and overseas looking to expand their corporate scale. Companies focused their R&D efforts on priority therapeutic areas and actively sought in-licensing opportunities outside their organization.

In the development of new drugs, the target is shifting from so-called "blockbuster drugs," which have a large number of potential patients and can generate large, stable future profits, to drugs that can provide effective treatment to specific patient groups. Biotech companies are said to assume a greater role because they usually concentrate their resources on a certain specific field and make decisions quickly. In response to these trends, the Japanese government, primarily led by central ministries including the Ministry of Health, Labour and Welfare (MHLW) and the Ministry of Economy, Trade and Industry (METI), has launched the Medical Innovation Support Office (MEDISO) and compiled the "Ito Review 2.0: Biomedical Edition" as part of its efforts to proactively support Japan-based biotech companies. The Conditional Early Approval System and the SAKIGAKE Designation System for pioneering drugs have been legislated in order to promote drug discovery in Japan.

Amidst the above business environment, the Company continued to focus its managerial resources on the recombinant human hepatocyte growth factor (HGF) protein and developed the business activities outlined below, in the belief that development of recombinant human HGF protein (development code: KP-100) will lead to therapeutic innovation, creating business opportunities and maximizing the value of the Company.

- 1. Drug development activities
- (a) Acute spinal cord injury (SCI)

The Company conducted a Phase I/II clinical trial with Professor Masaya Nakamura of the Department of Orthopaedic Surgery, Keio University School of Medicine as a coordinating investigator and obtained results that confirmed the safety and indicated the efficacy of the drug. The Company designed the Phase III clinical trial to verify the proof of concept (POC; a preliminary evidence of efficacy detected in humans with a new drug candidate under development) obtained in the Phase I/II clinical trial. On June 9, 2020, the Company submitted a clinical trial notification for the Phase III study to the Pharmaceuticals and Medical Devices Agency (PMDA).

In July 2020, the Company started the Phase III study at Spinal Injuries Center, Hokkaido Spinal Cord Injury Center, and Murayama Medical Center. A total of five medical facilities, with the addition of Japanese Red Cross Kobe Hospital and Aijinkai Rehabilitation Hospital in March 2021, which had conducted the Phase III clinical trial completed enrolling the last patients in April 2023 and the final follow-up for the last patient in October 2023. The Company received topline results of the Phase III clinical trial in February 2024, and is in the process of preparing for consultation with PMDA based on the results of the trial, with a view toward applying for approval to manufacture and market the drug in Japan.

In the meantime, the Company started a preliminary consultation with the U.S. Food and Drug Agency (FDA) in September 2023 in preparation for clinical development in the U.S. and received a response from the FDA in November 2023 in relation to the meeting for Pre-Investigational New Drug (Pre-Ind) application.

In order to submit marketing authorization application for the treatment of acute SCI, the Company is also conducting various tests related to the process of manufacturing recombinant human HGF. Trial manufacturing (process validation) of the drug substance using the same process as commercial manufacturing, as required for the submission, was completed two fiscal years ago. Process validation for manufacturing of the drug product was also completed in the previous fiscal year.

For the purpose of identifying more effective administration methods and timing with recombinant human HGF for SCI, the Company launched a joint research program with Keio University School of Medicine in February 2021. In this joint research program, the transplantation of human induced iPS cell-derived neural stem/progenitor cells owned by Keio University, combined with the scaffold-mediated delivery of HGF developed by the Company, demonstrated improvement in recovery of motor function in animal model of chronic complete spinal cord injury. In March 2022, Keio University and the Company jointly filed a patent application, followed by the filing of an application claiming priority based on the said patent application in March 2023. Furthermore, confirming that HGF administration in the acute phase, followed by hiPSC-NS/PC transplantation in the sub-acute phase, significantly improved motor function in animal models of severe SCI compared to each single treatment group, Keio University and the Company of both HGF and hiPSC-NS/PCs already has advanced to clinical trials in humans, a next-generation regenerative therapy combining the HGF and iPS cell technologies is expected to be put into clinical use before long for the treatment of acute and sub-acute SCI.

In June 2021, the APSS Congress Best Clinical Research Award was given for the presentation on Phase I/II clinical trial for acute SCI at the 13th Combined Meeting of Asia Pacific Spine Society & Asia Pacific Paediatric Orthopaedic Society (APSS-APPOS 2021; held from June 9 to 12, 2021 at Kobe International Conference Center).

In December 2021, the Company's patent was issued in Europe for an "HGF preparation suitable for treatment of nervous diseases". It covers the Company's proprietary drug formulation used in clinical trials for acute spinal cord injury, amyotrophic lateral sclerosis and vocal fold scarring, being the basis of expanding the target indications for HGF treatment. The patent was already granted in the US, Japan, Canada and Korea, and adding Europe further created a favorable intellectual property environment for the Company to develop HGF drug business worldwide.

(b) Vocal fold scarring (VFS)

For VFS, a disorder in which the vocal fold mucosa hardens and degenerates (fibrosis), an investigator-initiated Phase I/II clinical trial confirmed the safety of intracordal administration of the recombinant human HGF. It also detected signals of efficacy showing functional recovery of the vocal cord with some patients (J Tissue Eng Regen Med. 2017; 1-8.).

Following a preliminary consultation with PMDA in July 2019 and subsequent discussions with Kyoto Prefectural University of Medicine, the Company submitted a clinical trial application for a Phase III study (placebo-controlled, double-blind trial) in October 2022 which was then accepted by PMDA. The Company then began a clinical trial at University Hospital, Kyoto Prefectural University of Medicine, and the first subject was enrolled in January 2023. In May 2023, Kurume University Hospital, Tohoku University Hospital, Kawasaki Medical School Hospital and Nihon University Hospital were newly added as medical institutions for carrying out clinical trials, and case registration is currently moving forward at a total of five facilities.

In order to raise funds to finance clinical trial expenses, manufacture the investigational drugs, and develop a commercial formulation, the Company issued share acquisition rights in November 2021. By July 2022, all of these rights had been exercised. In addition, the Company has been utilizing public funds since April 2022, with its VFS development being selected for the Cyclic Innovation for Clinical Empowerment (CiCLE) project operated by the Japan Agency for Medical Research and Development (AMED).

(c) Amyotrophic lateral sclerosis (ALS)

A phase II clinical trial (placebo-controlled, double-blind trial) was conducted at Tohoku University Hospital and Osaka University Hospital as an investigator-initiated trial that started in May 2016, led by Professor Masashi Aoki of the Department of Neurology, Tohoku University. In November 2020, the enrollment of patients was completed, and the final follow-up for the last patient was completed in December 2021. Subsequent data analysis at Tohoku University has shown no statistically significant differences between the active and placebo groups for the primary and secondary endpoints. On the other hand, there were cases in which progression was slow in the active drug group, suggesting that more detailed analysis is required to interpret the results of this study. Regarding safety, the

incidence of adverse events was similar between the active drug group and the placebo group, confirming tolerability. Going forward, the Company plans to undertake additional analysis including biomarker evaluation in cooperation with Tohoku University, for which approval of the Institutional Review Board (IRB) of Tohoku University Graduate School of Medicine has already been obtained.

(d) Supply of drug substance to Claris Biotherapeutics, Inc.

The Company concluded a license and supply agreement with Claris Biotherapeutics, Inc. (Claris) of the U.S. in April 2020 to supply HGF drug substance for clinical development by Claris to treat ophthalmologic diseases in the U.S.

During the six months under review, the Company supplied the HGF drug substance based on the progress in development at Claris. Claris filed an Investigational New Drug (IND) application* in May 2021 to initiate a Phase I/II clinical trial for neurotrophic keratitis utilizing the various preclinical and clinical information related to HGF provided by the Company, and the first patient received treatment in August 2021. With this developmental milestone, the Company now receives a fixed annual technology access fee (royalty income), and recorded the fee for the applicable period in net sales. To initiate the clinical trial in Canada as well, Claris filed a clinical trial application to Health Canada in July 2022, which was approved. As now the trial continues in both the U.S. and Canada, further acceleration of patient enrolment is expected.

Furthermore, the Company formed a business alliance with Claris in September 2023 to improve the efficiency of the manufacturing method for recombinant human HGF. The purpose of the alliance is to meet growing global demand in the future and to achieve stable worldwide supply of recombinant human HGF.

* Clinical trial application filed with the U.S. Food and Drug Administration (FDA)

(e) Other collaborative research

In July 2022, the Company signed a collaborative research agreement with Kyoto University focused on applied research using HGF to create regenerative medicine products. The goal of this collaboration is to apply biomaterial technology to conduct exploratory research on optimal and effective next-generation treatments for target diseases, and to expand indications for KP-100 to other intractable diseases.

In addition, the Company has been conducting collaborative research with Tokyo Medical and Dental University since October 2018. In July 2022, the university performed the first autologous intestinal organoid transplantation treatment aimed at repairing intractable ulcers in ulcerative colitis. KP-100 developed by the Company was used to produce the intestinal organoid used in this transplantation treatment.

In September 2022, the Company decided to promote open innovation to pursue further potential of HGF proteins by seeking new research proposals from researchers regarding the use of HGF proteins.

Moreover, in September 2023, the Company issued share acquisition rights, and decided to use part of the funds raised for the creation of a new pipeline including the implementation and expansion of joint non-clinical research.

2. Business development activities

During the six months ended March 31, 2024, the Company had business development discussion with potential business partners to expand development of acute SCI outside Japan. In addition, the Company issued share acquisition rights in September 2023, for the purpose of partially funding clinical development and manufacturing development (improvement of the efficiency of the manufacturing method for recombinant human HGF) for acute SCI in the U.S. With this move it expected to clarify the Company's development strategy in the U.S., the largest pharmaceutical market in the world, and accelerate business alliance discussions.

In September 2021, "oremepermin alfa" was registered as the International Nonproprietary Name (INN) for recombinant human HGF protein (five amino acid-deleted, glycosylated; development code, KP-100), the drug substance of our development pipeline.

As a result of these efforts, during the six months ended March 31, 2024, net sales amounted to $\frac{43,029}{43,029}$ thousand (a year-on-year increase of 25.3%), while the Company recorded an operating loss of $\frac{4366,746}{366,746}$ thousand (operating loss during the six months ended March 31, 2023 was $\frac{4314,934}{314,811}$ thousand), ordinary loss of $\frac{4366,217}{366,217}$ thousand (ordinary loss during the six months ended March 31, 2023 was $\frac{4314,811}{314,811}$ thousand) and loss of $\frac{4366,217}{366,217}$ thousand (loss during the six months ended March 31, 2023 was $\frac{4315,557}{315,557}$ thousand).

Since the Company operates in a single segment of pharmaceutical development business, segment information is omitted.

(2) Explanation of Financial Position

1. Assets, liabilities and net assets as of March 31, 2024

Assets

Current assets as of March 31, 2024 increased by $\frac{1293,310}{1000}$ thousand from the end of the previous fiscal year to $\frac{12,910,927}{1000}$ thousand (an increase of 11.2% from the end of the previous fiscal year). This primarily reflected an increase in cash and deposits of $\frac{1353,073}{1000}$ thousand, mainly as a result of capital increase by way of execution of share acquisition rights. Non-current assets increased by $\frac{1202}{1000}$ thousand from the end of the previous fiscal year to $\frac{11,122}{1000}$ thousand (an increase of 7.9% from the end of the previous fiscal year). This resulted from an increase in investments and other assets of $\frac{1200}{1000}$ thousand.

As a result, total assets increased by \$293,392 thousand from the end of the previous fiscal year to \$2,912,050 thousand (an increase of 11.2% from the end of the previous fiscal year).

Liabilities

Current liabilities as of March 31, 2024 decreased by \$10,823 thousand from the end of the previous fiscal year to 198,230 thousand (a decrease of 5.2% from the end of the previous fiscal year). This was mainly due to a decrease of \$76,760 thousand in accounts payable - other, which was partially offset by an increase of \$65,092 thousand in advances received. Non-current liabilities increased by \$3,625 thousand from the end of the previous fiscal year). This was due to \$391,525 thousand (an increase of 0.9% from the end of the previous fiscal year). This was due to an increase in long-term accounts payable - other of \$3,625 thousand.

As a result, total liabilities decreased by \$7,198 thousand from the end of the previous fiscal year to \$589,756 thousand (a decrease of 1.2% from the end of the previous fiscal year).

Net assets

Net assets as of March 31, 2024 increased by \$300,591 thousand from the end of the previous fiscal year to \$2,322,294 thousand (an increase of 14.9% from the end of the previous fiscal year). This was mainly due to increases of \$334,650 thousand in both share capital and legal capital surplus due to a capital increase as a result of the exercise of share acquisition rights, which offset the recording of a loss of \$366,217 thousand.

This resulted in share capital of $\frac{432,196}{1,552,198}$ thousand, capital surplus of $\frac{43,430,168}{1,552,198}$ thousand.

2. Status of cash flows

Cash and cash equivalents (hereafter "cash") as of March 31, 2024 were ¥1,993,032 thousand, an increase of ¥231,792 thousand from the end of the previous fiscal year.

The status of cash flows for the six months ended March 31, 2024 was as follows.

Cash flows from operating activities

Net cash used in operating activities was \$315,253 thousand (net cash used in operating activities during the same period the previous fiscal year was \$294,458 thousand). This was mainly due to a loss before income taxes of \$365,471 thousand, offsetting an increase in cash resulting from a decrease in accounts receivable - other of \$44,755 thousand.

Cash flows from investing activities

Net cash used in investing activities was \$121,363 thousand (net cash used in investing activities during the same period the previous fiscal year was \$120,875 thousand). This was mainly due to payments into time deposits of \$121,281 thousand.

Cash flows from financing activities

Net cash provided by financing activities was ¥668,409 thousand (net cash provided by financing activities during the same period the previous fiscal year was ¥2,600 thousand). This was due to proceeds from issuance of shares resulting from exercise of share acquisition rights of ¥668,409 thousand.

(3) Explanation of Financial Results Forecast and Other Forward-looking Information

The financial results forecast for the fiscal year ending September 30, 2024 (October 1, 2023 - September 30, 2024) is unchanged from the forecast announced in "Financial Results for the Fiscal Year Ended September 30, 2023" on November 13, 2023.

(4) Notes to Quarterly Financial StatementsNotes on going concern assumptionNot applicable.

Notes in case of significant changes in shareholders' equity

For the six months ended March 31, 2023 Not applicable.

For the six months ended March 31, 2024

On September 4, 2023, the Company allotted its 13th series of share acquisition rights to Barclays Bank PLC. Chiefly due to the exercise of the 13th series of share acquisition rights during the first six months of the fiscal year under review, share capital and capital surplus increased by $\frac{1}{3}34,650$ thousand each.

As a result, as of March 31, 2024, share capital and capital surplus amounted to $\pm 432,196$ thousand and $\pm 3,430,168$ thousand, respectively.

Revenue recognition

Information on disaggregated revenue from contracts with customers

The Company operates in a single segment of pharmaceutical development business. Revenue disaggregated by main goods and services are as follows.

(Thousand	ven)
	Thousand	y CII

Significant subsequent events

Exercise of share acquisition rights

During the period between April 1, 2024 and May 13, 2024, the 13th series of share acquisition rights were exercised. An overview of the exercise of these share acquisition rights is shown below.

1. Number of share acquisition rights exercised 601

2. Type and number of shares issued	60,100 common shares
3. Increase in share capital	¥17,062 thousand
4. Increase in legal capital surplus	¥17,062 thousand
