2. Items Regarding the Functions to Execute Business, Audit, and Oversee Business Operations, Nominate Candidates, Determine Remuneration Amounts, Etc. (Outline of the Current Corporate Governance Structure)

As of the date of submission of this document, the corporate governance structure is constituted by the Board of Directors, the Audit and Supervisory Committee, and comptrollers. There are 7 Directors, include 5 ones who belong to the Audit and Supervisory Committee, and 4 of them are Outside Directors who belong to the Audit and Supervisory Committee.

In principle, the Board of Directors meets once a month, to share management information and take appropriate measures timely.

The Audit and Supervisory Committee is composed of 5 Directors, including 4 Outside Directors, and 1 full-time member is appointed.

Audit reports are produced through discussions by the Audit and Supervisory Committee after receiving reports from each member. Regarding measures for enhancing the functions of the Audit and Supervisory Committee, the Company appointed a full-time member and established the Audit and Supervisory Committee office, where a full-time staff member and a part-time staff member work, to closely cooperate with the Auditing Section, which is an Internal Audit Division, and the Internal Control Section.

Directors who concurrently serve as Executive Officers execute business in accordance with laws, regulations, the Articles of Incorporation, and in-house regulations, such as the regulations for the Board of Directors.

Regarding the business execution by Directors who concurrently serve as Executive Officers, the President & CEO proposes the allocation of tasks among Directors, and the Board of Directors approves said proposal.

When appointing Directors who concurrently serve as Executive Officers and determining their remuneration amounts, the Company consults with the Nomination and Remuneration Committee.

For internal audits, the Auditing Section was established, and 2 staff members report the results of in-house audits and improvement plans to the President & CEO and full-time Audit and Supervisory Committee Members. In addition, the Internal Control Section was established, and 3 staff members promote internal control, make efforts to improve effectiveness, and report their evaluations on the development and operation of internal control systems to the President & CEO and full-time Audit and Supervisory Committee Members.

For comptrollers, the Company concluded an audit contract with Deloitte Touche Tohmatsu LLC, and developed an environment where they can conduct fair and appropriate audits as the Company provides them with necessary information on accounting and internal control. Comptrollers audit the accounting and internal control from an independent standpoint, and give guidance and advice about issues regarding accounting and internal control when necessary. In the Company, the Audit and Supervisory Committee specified that the term of office of a comptroller is up to 10 years in the "policy for

adopting proposals for the appointment, dismissal, reappointment, etc. of comptrollers.”

3. Reason for Selecting the Current Corporate Governance Structure

The Company has an Audit and Supervisory Committee, and appointed 5 Directors, including 4 outside ones, who belong to the Audit and Supervisory Committee. When “Audit and Supervisory Committee Members,” who are in charge of audits, serve as Directors and are provided with voting rights at a meeting of the Board of Directors, this will enhance the function to audit and supervise business operations. In addition, when all Outside Executives, who are rare human resources, belong to the Board of Directors, the ratio of Outside Directors will increase, and this is expected to improve the transparency of business administration and lead to discussions on management from the viewpoints of shareholders. In addition, the Company adopted an executive officer system, in order to grow the corporate group further and fortify the corporate governance structure. By separating the decision making and supervising function from the business execution function of the management, the Company aims to clarify the responsibility for execution and makes business execution swifter.
