“GLOBAL WiFi®” offers data communication plans tailored to customers’ needs. However, with the recent increase in data transmission speeds and changes in the Internet usage environment, plans with faster transmission speeds and no capacity limits tend to be selected. The “Unlimited Plan” allows users to use the

service without worrying about data capacity (remaining capacity) while traveling abroad, even when sharing the service with multiple people such as friends and family.

With this expansion, the “Unlimited Plan” now covers 111 countries and regions. Until now, South Africa was the only African country offering the “Unlimited Plan,” but now 16 countries have been added, focusing on regions where many Japanese companies have established operations and resort areas. Please take advantage of our “Unlimited Plan” which allows you to use your data without worrying about data capacity, not only when traveling on business to the relevant areas but also when traveling.

“GLOBAL WiFi®” will continue to improve its services to provide a comfortable Internet environment around the world.
